Summary

Skilled machine learning and artificial intelligence engineer with solid expertise in Python. Experienced in building innovative models using TensorFlow and Keras. Proficient at solving complex problems through logical reasoning and optimized algorithm design. Passionate about advancing AI and machine learning through practical, impactful solutions.

Technical Skills

Programming languages: C++, Java, Python, PHP

Web Development: HTML, CSS, Bootstrap, JavaScript

AI, ML: Deep Learning, Natural Language Processing

Internships

Machine Learning Intern, Cognifyz Technologies

May 2025-June 2025

- Built a content-based recommendation system that improved restaurant rating prediction accuracy by 15%, using user preference data and similarity scoring.
- Analyzed geospatial data from more than 50 locations. This helped reveal performance trends and provided insights about high-performing areas and customer groups.

Python Full Stack Virtual Internship, EduSkills Academy

April 2025-June 2025

- Developed full-stack web applications using Python, HTML, CSS, and JavaScript. Focused on integrating frontend and backend functionality to create a smooth user experience.

Education

Sri Ramakrishna Mission Vidyalaya College of Arts and Science
Bachelor of Science Computer Science (CGPA:7.49)

Coimbatore, Tamil Nadu
June 2021-May 2024

SRM Institute of Science and Technology
MCA-Generative AI (CGPA:9.5)

Kattankulathur, Chennai
July 2024-May 2026

Projects

SSM Interiors

- Created an interactive web platform for interior and exterior design using HTML, CSS, JavaScript, and Bootstrap for a responsive, visually appealing frontend. Used MySQL handles backend data storage.

Personal portfolio website

- Designed and implemented a responsive portfolio website using HTML, CSS, and JavaScript. It has smooth navigation and is optimized for mobile devices, which improves user experience.

Certifications and Achievements

- Hands-on IoT Workshop:** Participated in a hands-on workshop on Internet of Things (IoT) technologies, gaining experience with sensor integration, microcontroller programming, and device connectivity.
- National Level Math Fest:** Participated in events such as Memory Check and Treasure Hunt. These activities improved my logical thinking, problem-solving, and teamwork skills in a competitive setting.
