Objective

MCA postgraduate with specialization in Artificial Intelligence and Software Development with hands-on experience in Python, Java, SQL, and web technologies. Real-world experience with full-stack application development, data analysis, and machine learning from internship and course projects. Experience in applying Agile methodologies, debugging, and testing to provide efficient and scalable solutions.

Education

SRM Institute of Science and Technology	Kattankulathur, Chennai
MCA-Generative AI (CGPA:9.5)	July 2024-May 2026
Sri Ramakrishna Mission Vidyalaya College of Arts and Science	P.N Palayam, Coimbatore
Bachelor of Science Computer Science (CGPA:7.49)	June 2021-May 2024

Projects

SSM Interiors

- Designed and developed an interactive web application for interior/exterior design using HTML, CSS, JavaScript, and Bootstrap, improving navigation efficiency for 50+ design templates.
- Implemented a MySQL database to manage backend storage, enabling smooth handling of hundreds of customer records.

Personal portfolio website

- Engineered a personal portfolio website leveraging HTML, CSS, and JavaScript, featuring fully responsive design and cross-browser compatibility, leading to a 40% improvement in mobile user engagement.

RAG CHATBOT

- Built a retrieval-augmented generation chatbot using no-code tools (Flowise), integrating vector databases and LLMs to deliver accurate, context-aware answers from uploaded documents.

Technical Skills

Programming languages: Java, Python, PHP, SQL, .NET, C/C++(basics)
Data Analysis & Visualization: Excel, Power BI
Web Development: HTML, CSS, JavaScript, Bootstrap, MERN (basics)
Software Development: Agile, SDLC, Debugging, UI Testing
AI, ML: Deep Learning, Natural Language Processing
Tools & Platforms: MySQL, Git/GitHub, Google Colab, VS Code

Internships

Machine Learning Intern - Cognifyz Technologies

May 2025-June 2025

- Built a content-based recommendation system that improved restaurant rating prediction accuracy by 15%, using user preference data and similarity scoring.
- Analyzed geospatial data from more than 50 locations. This helped reveal performance trends and provided insights about high-performing areas and customer groups.

Data Science and Analytics Intern - Future Interns

July 2025-August2025

- Developed interactive dashboards using Power BI and Google Looker Studio to visualize e-commerce sales data, resulting in a 15% improvement in identifying key sales trends.
- Applied data cleaning, visualization, and NLP techniques in Python, analyzing 1,000+ feedback entries to identify satisfaction trends and actionable insights.

Certifications and Achievements

- Power BI Workshop (Office Master, July 2025):** Engineered AI-enhanced Power BI dashboards to visualize 1,000+ sales transactions, enabling quicker identification of top-performing products and increasing the lead conversion rate by 8%.
- IoT Workshop:** Gained experience with sensor integration, microcontroller programming, and device connectivity.
